About Me

A performance marketer with roots in analytical chemistry and a 10-year lab background. I bring the same precision I applied to metal analysis and quality control into campaign optimization — data-driven, methodical, and results-focused.

// ORIGIN STORY

Not a straight line.

A 15-year journey through chemistry, code, and curiosity.

~2001 · Age 12

Komputer Bekas & Warnet

First secondhand computer, full of problems. Taught himself to build PCs, reinstall Windows, and even wrote a VBS virus at 13. Was known as the "computer guy" among friends — yet also loved chemistry.

2009 · SMAKBO

Best Chemistry SMK in Indonesia — and still coding

Chose Chemistry vocational school (SMAKBO) over regular high school. But joined Web Design extracurricular, consistently top-ranked in computer subjects.

2012–2022 · Lab Years

10 Years of Analytical Precision

Lab analyst across food, dairy, and environmental industries. His supervisor once said: "Our IT department's computer knowledge doesn't come close to yours."

2016–2019 · Hidden Exploration

Web Projects & First Meta Ads

Joined digital communities, secured remote web projects in 2018. Tried Meta Ads in 2019 — but without proper framework, flying blind.
COVID stopped everything.

2022 · The Pivot

RevoU: The Turning Point

After finishing college and switching to non-shift work, committed fully.
200+ hours of RevoU bootcamp gave the framework.
Never looked back.

"I still consider this the beginning of a long journey in tech and digital that started when I was 12."
